## The Client: The Press Club

Voted 'Best New Restaurant' by the Age Food Guide 2008, The Press Club has emerged as one of the most innovative and in-demand restaurants in Melbourne.

### The Problem:

The Press Club required a complete, 'end to end' POS solution, that was powerful at the front of house but also provided a high level of payroll, stock and financial control at the back of house.

### The Decision:

The decision was easy for the Press Club. One of the directors had already implemented RedCat solutions in other ventures in the past, after thoroughly investigating all the other POS solutions on the market.

**“From our past experiences, we had no hesitation in choosing RedCat for The Press Club”**

George Sykiotis, Co-Owner.

### The Outcome:

“The RedCat solution has improved our productivity and processing of orders. There is no doubling up. You can control everything from stock management to wages. We can track a bottle of wine from when it is ordered to when it is sold and this is extremely valuable to us.”

RedCat offered The Press Club far more financial control. While other restaurants continually struggle to co-ordinate procedures, RedCat solutions are simple and efficient, ensuring valuable time is spent on customer service

and preparing fantastic food rather than dealing with cumbersome accounting processes.

“We would recommend RedCat and will continue to use the system in all our ventures. It delivers a very positive return on our investment.”

George Sykiotis, Co-Owner
